

AI USB Video Conference Device

FEATURE SPOTLIGHT

- **Super-wide 120° field of view**

OneView N110 has an ultra-wide field of view of 120°, allowing everyone in the room to be seen, even those close to the camera or seated at the edges of the room.

- **Ultra HD 4K image sensor**

Supports multiple resolutions, including 4K (Ultra HD), 1080p (Full HD) and 720p (HD) to best support the quality offered by your application and monitor.

- **6-microphones and custom-tuned speaker**

Six broadside beamforming, omni-directional microphones with noise and echo cancellation—plus a custom-tuned speaker—are specifically optimized for small and medium sized conference rooms.

- **Auto framing and speaker tracking function**

OneView N110 can automatically obtain the best image of the conference room according to the participants and their location in the conference room, and automatically adjust the view when participants enter and exit the conference room to ensure that everyone is clearly visible and presents the best picture. The speaker tracking function can automatically locate the current speaker and present its close-up picture so that everyone knows who is speaking.

- **5x HD zoom**

Zero in on close-ups of objects and whiteboard content with outstanding detail and clarity.

OneView N110

OneView N110 is a conference camera designed for small and medium-sized conference rooms. With the 120° ultra-wide field of view that can cover the entire room, N110 allows everyone in the conference room to clearly enter the lens. The low-distortion lens, 4K Ultra HD optical performance and two camera presets designed by Nexvoo can bring extraordinary video quality and further enhance face-to-face collaboration. The N110 also has six horizontally directed beamforming microphones and custom-tuned speakers to help ensure that the meeting sound is as exciting as the video. Its plug-and-play function is suitable for almost any video platform, providing a cost-effective solution for small and medium-sized conference rooms.
